RDS Tuner • CD Player
EDI and Steering Wheel Adaption

CD Player
The CD player is compatible with regular shaped 12cm disks in CD Audio, CD-R and CD-RW format. CDs which do not comply with international audio CD standarts (Red Book) may not be supported.

External Display Interface (EDI)
The EDI is the ability to connect the standard display in the cockpit when installing a VDO Dayton Exclusive Line car radio.[1]

Steering Wheel Remote Control Interface
The Steering Wheel Remote Control Interface allows for the operation of the car radio via the original steering wheel remote control.[1]

4-Channel Preamp Out
The 4-channel line out multiplies the sound power combinations and pre-amplifier connections. To achieve an optimal signal to noise ratio and increased dynamic, outputs are supplied at 2V.

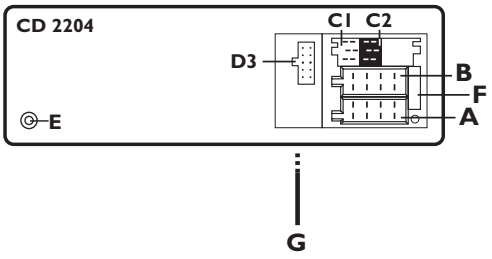
Detachable Flipdown Front
Fully detachable unit for theft protection.

Speed Dependant Volume Control (SDVC)
Intelligent volume control which automatically adjusts loudness depending on your speed (SDVC = SMART Volume)

Loudness Control
Boosts the bass out of the system! 3 levels of effect can be chosen according to your preference.

Telephone Mute
During a telephone call the volume of the car radio is muted automatically.

[1] Only applies to certain vehicle models; separate adaptor cable required.



Product Design
- Black Finish
- Detachable Flipdown Front
- Green Display Colour
- Green Key Illumination
- Protection LED
- Pilot Light

Tuner
- RDS Tuner
- FM with RDS Traffic, News
- MW, LW
